

Zenab Waqi

Frontend Software Engineer | React | Next.js | JavaScript (ES6+) | Firebase
zeevaki@gmail.com | 469-766-1216 | Dallas, Texas | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Frontend Software Engineer who builds and deploys user-centric web applications with React, Next.js, and JavaScript (ES6+), backed by Firebase. Has shipped five live, responsive projects ranging from an AI-driven skincare assessment flow to an NFT marketplace, each deployed end to end with clean component architecture. Brings an uncommon mix of software quality-assurance experience and a data-driven instructional background that turns complex problems into intuitive interfaces. Available for remote frontend roles and contract work.

Technical Skills

Languages & Web: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React, Next.js, Node.js

Frontend Specialisms: Responsive design, component architecture, state management, REST API integration, performance optimization, debugging

Tools & Platforms: Firebase/Firestore, Vercel, Git, GitHub, npm

Professional Experience

Dallas Independent School District (Dallas, Texas)

Feb 2022 - Present

Elementary School Mathematics Educator (5th Grade)

- Programmed and deployed interactive, web-based gamified math modules to supplement core curriculum, significantly increasing student engagement.
- Built data-driven assessment views to analyze performance metrics and tailor individual learning pathways.

CureMD, International Healthcare Software House (Lahore)

2013 (7 months)

QA Lead

- Led end-to-end quality assurance for enterprise healthcare applications, coordinating with cross-functional development teams to identify, document, and resolve software defects.
- Developed and executed comprehensive test plans, test cases, and regression suites across multiple concurrent software releases.

Instagram & Facebook

Ongoing

Digital Content Creator & Community Manager

- Built and independently scaled cross-platform online communities to 80,000+ followers, analyzing engagement data and algorithmic trends to optimize content delivery.

Technical Projects

Skinstric | [Live Demo](#)

- React, Next.js, AI integration: individual skin-analysis assessment flow, personalized routine engine, responsive cross-device UI.

Ultraverse (NFT Marketplace) | [Live Demo](#)

- React, Next.js: NFT marketplace with trending collections, top-creator profiles, and a fully responsive browsing experience.

Summarist | [Live Demo](#)

- React, Next.js: book-summary platform with read-or-listen condensed titles, personalized recommendations, and audio briefcasts.

Library | [Live Demo](#)

- React, JavaScript: digital library for browsing and organizing book collections with clean component architecture and a responsive UI.
